TO: Minerals File

FROM: Tony Gallegos, Reclamation Engineer *aa*

RE: Site Inspection, C & R Minerals, C & R Mine/Mill Site, S/019/024, Grand County, Utah

Date of Inspection: May 6, 1997  
Time of Inspection: 1150 - 1210  
Conditions: Partly cloudy, windy, warm  
Participants: Will Stokes, SITLA; Tony Gallegos, DOGM

Purpose of Inspection: To examine this site while in the area in order to close out the file as requested by the operator

Upon arriving at this site we talked with individuals at the house trailer, currently located near what would be described as a large barn type building. We then met Mr. Robert Thomas, who was working at the site for the new operations. He knew of the area for this particular small mine and accompanied us to the site he believed was indicated on the map

Photos were taken of the area in question. This site is visible in the photos near the fence line which is believed to represent the center line of the section. The mine site indicated on the map with the notice would overlap a portion of the fence line with a field on the left and some assorted mine equipment or scrap on the right.

There were no visible signs of mining disturbance in this area. Mr. Thomas indicated that the property to the left of the fence line is now owned by a dentist believed to be Dr. Ross out of Moab. The property on the right, which included some mine equipment, was now under control of the new operation. Photographs were taken of this area to document the current status.

We then proceeded to the processing area which is now part of this new project under file number S/019/042.
